

Product Specifications

Enroll™ Tablet Chair

Product No: 54325-XXXX-XX-XX-XX

BASE

The base is two pieces of injection molded reinforced nylon attached by three #10 x 3/4" flat head screws in each corner. The base can support up to 253 lbs. The base has four 50 mm casters attached by friction ring stem inserts.

ROTATING MECHANISM

The chair shell rotates 360° pivoting on a 3/4" x 5" Grade 8 steel flanged bolt. Two needle roller bearing/washer assemblies are saddle mounted on either side of the base and a 3/4" POM flanged bushing. Two interlocking cast aluminum pieces and injection molded covers hold the tablet arm assembly in place. The lower aluminum piece suspends the chair and tablet on the needle roller bearing while the upper piece has mounting holes for the chair shell using 1/4" pop rivets and a slot for a 3/4" steel nut. The flanged bolt is secured with a 3/4"-16 standard steel nut and a 3/4"-16 steel jam nut.

TABLET ARM AND TABLET

The tablet arm is a 14 Ga powder coated steel tube welded to a 12 Ga steel ring. Grooves in the rotating mechanism limit the independent rotation of the tablet arm to 180°. An injection molded cap connects the arm to a cast aluminum support. This aluminum support is attached to the tablet by five M6 x 14mm socket head screws. The 26" x 14" x 1" tablet is two pieces of molded ABS attached to each other with fourteen M6 x 16 mm flat head screws. The tablet top is 29-3/4" high. Tablet is also available with 24 Ga white porcelain steel surface for use as a markerboard.

CHAIR SHELL

Shell is a single-piece injection molded shell of reinforced polypropylene. Shell is offered in all eight (8) Hierarchy colors and is available with or without arms. The seat height is 18" high.

OPTIONS / ACCESSORIES

The Hierarchy chair shell is available with or without arms.

The Enroll Tablet Chair is available with an attached cup holder mounted underneath the tray.

The Enroll Tablet Chair is available with a porcelain steel tablet.
