STEP 1

After placing plastic inserts into frame corners as shown, insert Leg from outside and secure with screw (A) from inside frame, tightening into Leg until snug. Use screws with unpainted heads for this step.

STEP 2

Attach short and long crossbars as shown, capping Long Crossbar ends with Plastic Cover before binding at either end with 2 screws (A for Round, B for Rectangular).

STEP 3

Snap on additional Plastic Covers to exposed ends of Short Crossbars before screwing on Leg Brackets with 2 screws (C) each. Note positions of Left and Right Brackets depicted below. Brackets will be marked with "1" or "2" which should be right side up throughout assembly and attached to appropriate end.

STEP 4

Keeping footrest in same position as previous step ("1" and "2" should NOT be upside down), lower between legs. Aligning Leg Brackets with inside holes on legs, secure to legs with 2 screws (C) per leg. Note that footrest will only fit onto legs one way so if unable to align holes, return to previous step and carefully read instructions.

STEP 5

Attach legs directly to top with 10 wood screws (D) per leg.

STEP 6

Insert all 4 Casters by screwing into legs with lock washers (E). Install Locking Casters on same side of table for easier access. If caster pops off during installation, reattach by firmly pressing caster back in.
